

# Media Cart Instructions

## Contents of Media Cart

1 Network Cable

1 AirPort Base Station

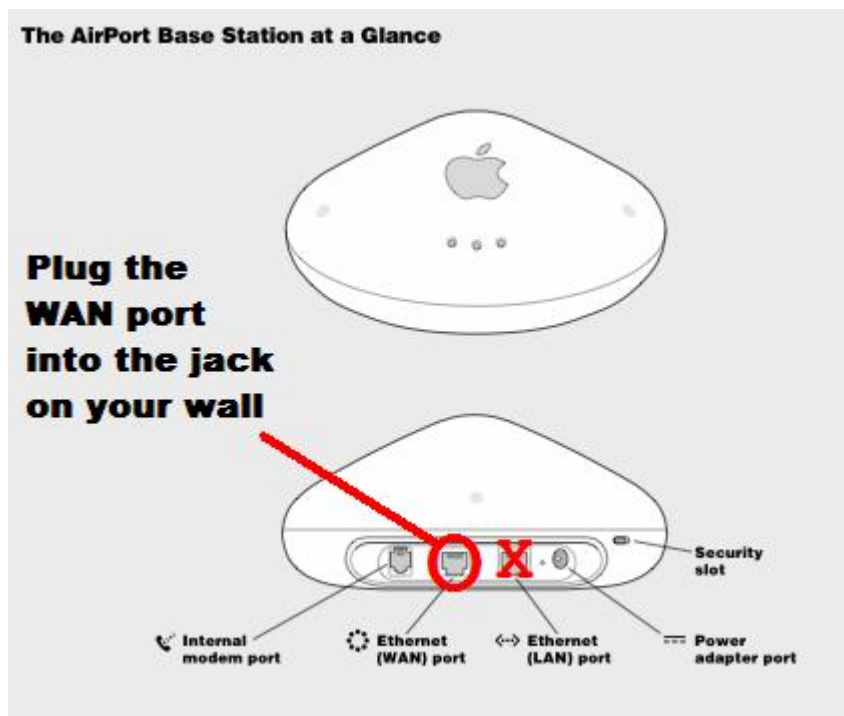

8 Apple iBook Laptop Computers

10 Dell D520 Laptop Computers

1. Plug the network cable attached to the airport into an orange data jack located in a classroom. If the cable is not connected to the airport it needs to be inserted into the wan jack on the airport.

2. Now you can plug the power cord from the cart into an outlet.

**IMPORTANT: THE NETWORK CABLE MUST BE PLUGGED IN BEFORE POWER CORD IS PLUGGED IN.**

3. Distribute and power on computers. Dell's will boot up to a Windows login with a username of User. There is not a password. Macs boot directly to the desktop. If students wish to save or retrieve files they must log on to the Novell Network. See attached instructions on how to log on to the network.

**Users must save files to their network folder.  
Machines reset when they are restarted. Any  
files saved to the computer will be deleted.**

4. Please return all components to the cart and place them in the proper places.
